Dolan McEnery High Yield Strategy Overview

Dolan McEnery High Yield is a fixed income investment product that utilizes U.S. corporate investment grade, U.S. corporate high yield and U.S. Treasury securities. Dolan McEnery High Yield is approximately 90% U.S. corporate high yield bonds and 10% U.S. corporate investment grade bonds. The Dolan McEnery High Yield Composite was established and created on September 30, 2015.

Performance

Investment Strategy and Process

Dolan McEnery searches for bonds that trade at wide spreads and attractive prices but are issued by companies with acceptable levels of credit risk. The firm's core competence is credit analysis and it does its credit research in-house, not relying at all on credit ratings or third party research. The firm takes a lender's approach to fixed income investing.

Dolan McEnery creates concentrated portfolios of its best ideas. The number of issuers in the product ranges from 25 to 45. This number of holdings provides diversification and yet allows clients to benefit from the firm's analysis.

Strategy Risk Information

	1 Year	3 Year	5 Year	7 Year	Inception
Sharpe Ratio	1.11	0.57	-0.01	0.16	0.38
Excess Return vs Corporate HY Ba/B	-0.27	-0.47	-0.56	-1.16	-1.15
Information Ratio vs Corporate HY Ba/B	-0.24	-0.42	-0.38	-0.60	-0.65
Tracking Error vs Corporate HY Ba/B	1.12	1.12	1.47	1.93	1.78

The Strategy Risk Information data is reported as of 03/31/2026 by eVestment Alliance. eVestment Alliance (eA) is an innovative, web-based provider of comprehensive investment information and analytic technology. eVestment Alliance collects information directly from investment management firms and other sources believed to be reliable. Returns for periods exceeding 12 months are annualized. Past performance is no guarantee of future results. The data above is net of fees.

Strategy Management

- Bottom up approach focusing on credit analysis and adding value to client portfolios through the identification and selection of bonds Dolan McEnery believes are undervalued
- Does not invest in the securities of banks or broker dealers
- Duration neutral to the benchmark
- All maturities are ten years or less
- Position sizes are approximately 4%

More than 10 years	0.00	2.01

Risk Profile

Dolan McEnery High Yield composite risk profile versus its benchmark since inception.

Market Review

The first quarter of 2026 was a very volatile period in financial markets. Many fixed income and equity indices fell during the quarter. Software and technology companies sold off as markets processed new AI features. Conflict in the Middle East led to higher oil prices, higher Treasury yields, and wider credit spreads. Investors fear that higher oil prices due to the closure of the Strait of Hormuz will lead to higher inflation.

At its January and March meetings, the Federal Open Market Committee (FOMC) left the federal funds rate unchanged. The rate remains at a target range of 3.50% to 3.75%. Market expectations for the path of interest rates moving forward shifted dramatically in the first quarter. At the start of the year, markets expected the federal funds rate to end 2026 at 3.05%. By the end of the quarter, that expectation had moved up to 3.57%. Markets will continue to monitor incoming economic data and commentary from Fed officials. Credit quality remains strong and Dolan McEniry will continue to monitor markets for any opportunities that may arise.

During the quarter, Treasury yields increased. The ten-year U.S. Treasury yield rose from 4.17% to 4.32%, the five-year yield increased from 3.73% to 3.94% and the two-year yield increased from 3.48% to 3.80%.

Per Bloomberg data, spreads of corporate investment grade bonds widened eleven basis points during the quarter to an average option adjusted spread ("OAS") of +89 basis points. The OAS of the Bloomberg Corporate High Yield Index widened 51 basis points to +317 basis points at quarter end.

Portfolio Commentary

During the quarter, the High Yield Composite had a gross return of -0.36% and -0.51% net versus the -0.42% return of the Bloomberg Corporate High Yield Ba/B Index. Sector attribution versus the benchmark is provided in the following table:

	Dolan McEniry High Yield (Gross)	Dolan McEniry High Yield (Net)	Bloomberg U.S. Corporate High Yield Ba/B
Treasuries/ Government Related	+0.73%	+0.73%	+0.00%
Corporate Bonds IG	-1.76%	-1.76%	+0.00%
Corporate Bonds HY	-0.21%	-0.21%	-0.42%
Cash (including fees)	+1.20%	+1.05%	+0.00%
Total	-0.36%	-0.51%	-0.42%

Dolan McEniry outperformed the Bloomberg High Yield Ba/B Index by 6 basis points gross during the quarter. The outperformance was due to security selection.

Outlook and Strategy

Dolan McEniry believes that client portfolios are positioned to provide reasonable absolute and relative returns going forward. Dolan McEniry's core competence is credit analysis, and we focus on a company's ability to generate generous amounts of free cash flow over time in relation to its indebtedness. Investment safety and risk mitigation are of primary importance as we continue to search for undervalued fixed income securities. As of March 31st, the Dolan McEniry High Yield Composite had a yield to worst of 5.40% and yield to maturity of 5.47%. Dolan McEniry will continue to follow our disciplined approach as value investors by deploying cash and investing in bonds with wide spreads and solid credit fundamentals.

Security Selection

1. Composite dispersion is not presented for years where there are 5 or fewer portfolios in the composite for the full year because it is not statistically meaningful.
2. The 3-year ex-post standard deviation is not required to be presented for periods prior to 2011 or when 36 monthly composite returns are not available.
3. Returns are calculated and presented as net of maximum annual advisory fee, 2.50%, plus the maximum product manager fee, 0.60%.

Compliance Statement

Dolan McEnery Capital Management, LLC claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Dolan McEnery Capital Management, LLC has been independently verified for the periods September 30, 1997 through December 31, 2024. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. The Dolan McEnery High Yield Composite has had a performance examination for the periods September 30, 2015 through December 31, 2024. The verification and performance examination reports are available upon request.

*Dolan McEnery High Yield inception date is September 30, 2015; 2015 is a three month period.

Definition of the Firm

Dolan McEnery Capital Management, LLC is an independent investment management firm established in 1997 and is an SEC registered investment adviser. Registration of an adviser does not imply a certain level of skill or training. Dolan McEnery Capital Management, LLC manages fixed income accounts utilizing Dolan McEnery's specific strategies for institutional and individual clients.

Definition of the Composite

Dolan McEnery High Yield is a fixed income investment product benchmarked against the Bloomberg U.S. Corporate High Yield Ba/B Index. In this strategy, the firm utilizes entirely U.S. corporate high yield bonds; however, the strategy will invest in U.S. corporate investment grade bonds when appropriate. Dolan McEnery High Yield is approximately 90% U.S. corporate high yield bonds and 10% U.S. corporate investment grade bonds. The Dolan McEnery High Yield Composite was established and created on September 30, 2015.

There were no non-fee paying accounts in the composite as of December 31, 2024. Performance results prior to July 31, 2016 are derived from the returns of fully discretionary separate accounts made up of the firm's own capital. Due to the internal nature of the funds, no management fees have been charged to the accounts throughout their lifespans.

Benchmark

Bloomberg U.S. Corporate High Yield Ba/B Index. The Index is the Ba/B component of the Bloomberg US Corporate High Yield Index. The Index measures the USD-denominated, high yield, fixed-rate corporate bond market. Bonds from issuers with an emerging markets country of risk, based on the indices' EM country definition, are excluded. The corporate sectors include industrial, financial institutions, and utility. Bonds must have at least one year until final maturity.

Intra-month cash flows from interest and principal payments contribute to monthly Index returns but are not reinvested at a short-term reinvestment rate between rebalance dates. At each rebalancing, cash is effectively reinvested into the returns universe for the following month so that Index results over two or more months reflect monthly compounding. One cannot invest directly in an Index.

List of Composites

A complete listing and description of all composites, limited distribution pooled funds, and broad distribution pooled funds is available upon request.

Dispersion

The dispersion of annual returns is measured by the asset weighted standard deviation across gross portfolio returns represented within the composite for the full year.

Performance

Gross and net performance is net of all trading expenses. Composite Net Returns are presented net of actual investment management fees. Composite Net of Maximum Annual Advisory and Product Fee returns are calculated by subtracting 1/12th of 3.10% from the monthly gross return. 3.10% represents the maximum wrap fee that a sponsor may charge clients seeking investment management services in the designated strategy. Wrap fees may include, among others, custodial fees, portfolio management fees, administrative fees and transactional fees. The maximum product fee Dolan McEniry charges for management of a client portfolio is 60 basis points. The maximum wrap fee charged by a wrap platform is 250 basis points annually. Prior to 12/31/2018, net-of-fee returns were based on a model 0.60% (60bps) investment management fee applied monthly and direct trading expense. All returns are based in U.S. dollars and computed using a time-weighted total return. Composite returns are asset weighted individual portfolios computed monthly. Returns for periods exceeding 12 months are annualized. The Dolan McEniry High Yield Composite includes both price performance and coupon/dividend income as does the Bloomberg U.S Corporate High Yield Ba/B Index. Results reflect the reinvestment of dividends, interest and other earnings. The Dolan McEniry performance reflected above is not necessarily indicative of future results and, as a composite of different accounts, does not necessarily reflect the exact performance of any specific account. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request.

Fee Schedule

Dolan McEniry Capital Management, LLC's standard fee is 0.60% (60bps) of assets under management.
