## The company

DBi was founded in 2012 and specializes in building portfolios that aim to outperform leading hedge funds by identifying, and investing in, the key drivers of pre-fee performance.

- Based in New York, was co-founded and is led by Andrew Beer and Mathias Mamou-Mani.
- Partially owned by iM Global Partner (non-controlling share).
- Widely followed research on hedge funds, managed futures and liquid alternatives.

## Investment philosophy

DBi believes that two hedge fund strategies can be replicated efficiently:

- **Managed futures**
- **Multi-strategy**

It follows a simple, smart and robust investment process to identify the key drivers of hedge fund performance and replicate these positions using highly liquid futures. The strategies are managed in a systematic and disciplined manner within a robust IT environment.

## Key strategies

### Managed Futures

A proven diversifier with a low correlation to equities over the long term that seeks to provide capital protection during periods of market stress.

### Absolute Return

An all-weather solution that seeks to leverage the collective wisdom of leading hedge fund managers in the multi-strategy segment.

## UCITS funds managed by DBi

### iMGP DBi Managed Futures Fund

Based on the same **Managed Futures** strategy that is deployed by DBi in its US-based ETF. It seeks to replicate the pre-fee returns of a representative basket of leading managed futures hedge funds.

These strategies are replicated through highly liquid futures in equity, fixed income, currencies and commodities.

### SEI Liquid Alternative Fund

Designed to generate absolute returns by replicating the core trades of 70 leading hedge funds.

Built as a complement to a portfolio of stocks and bonds, it aims to deliver mid-to-high single-digit returns during normal markets and preserve capital during periods of volatility.
